Forecast for Wednesday 29 May 2024

Weather: A cloudy morning with outbreaks of rain or drizzle at times. For many places the cloud will lift and break through the morning allowing for some bright spells from late morning onwards, but low cloud will persist all day towards Ben Rinnes and east facing-upslopes of the Cairngorms. Heavy showers will break out where skies clear further west, these may be thundery at times. These showers will ease and push south through the evening with more cloud spreading in behind.

Chance of cloud-free hill tops above 800m: 30% at first, rising to 60% through the middle of the day.

Low cloud and visibility: Extensive low cloud down to 300-400m at first. This will lift and break for most places during the day with visibilities and cloud bases generally good from midday onwards, but they will drop suddenly as any showers pass by. Cloud will remain down to 400-500m in the east, and become more extensive across the rest of the region again through the evening.

Met Office Aberdeen Meteorologist's View
Note the cool temperatures at height.

Forecast for Thursday 30 May 2024
Weather: Extensive early cloud with outbreaks of rain or drizzle. This cloud lifting and breaking to allow bright spells and some showers from late morning. Dry with some clearer skies in the evening.

Maximum wind: North or Northwest. Generally 15-20mph, gusting up to 35-40mph on the higher summits. Up to 30mph, gusting 45-50mph on the Cairngorm plateau.

Chance of cloud-free hill tops above 800m: 30%, rising to 60% by midday.

Low cloud and visibility: Extensive cloud around 400-500m at first, but this will break and lift through the morning. After that, cloud will generally be above summits and generally excellent visibilities, but with the odd reduction in any showers and patchy cloud down to 700m or so.

Temperature: **Glens:** Plus 10 to plus 15 Celsius.
At 800m: Plus 5 to plus 8 Celsius.
Freezing level: Above summits.
